

Huseynov Farid

SOFTWARE ENGINEER

PROFESSIONAL SUMMARY

Java Software Engineer with over a year of experience in internal web service development using Java 21 and the Spring ecosystem. Demonstrated ability to rapidly adapt to complex architectures and contribute effectively to high-traffic ecosystems, gained through engineering experience at Rakuten and Dunya School. Possesses a strong understanding of OOP, clean code principles, and relational databases.

EDUCATION

Bachelor of Information Technologies | 2023-2027

Azerbaijan State University of Economics, Baku

- Faculty: Digital Economy

SKILLS

Hard

- **Programming Languages:** Java, Python, JavaScript, Swift, SQL
- **Frameworks:** Spring Boot, Spring Security, Spring MVC, Spring Data (JPA and Hibernate), Spring Cloud, Spring AI, OAuth2.
- **Databases:** PostgreSQL, SQLite, MongoDB, TiDB
- **Tools:** Git & GitHub, Linux, WSL, Docker & Kubernetes, JWT
- **Languages spoken:** English (C1), Russian (Native), Japanese (N5 - Basic)

Soft

- Communication, Teamwork, Problem-solving
- Critical thinking, Leadership, Creativity
- Decision-making, Adaptability

PROJECTS

DuckVest | Investment Brokerage Platform

Java 21+, Spring Boot, React, PostgreSQL

- Developed a Spring Boot backend simulating a stockbrokerage platform with trading, user portfolios, and real-time market data integration.

MyGarden | Smart Irrigation Decision Support System

Express.js, React, MongoDB

- Led the team and worked on both idea development and backend implementation of MyGarden MVP, which won 3rd place at the "Yaşıl Qarabağ" hackathon.

WORK EXPERIENCE

Java Software Engineer Intern (Part-time) | Nov 2025 – Apr 2026

Rakuten Ichiba Division | Tokyo, Japan (Remote)

- Assisted in the development and maintenance of high-traffic backend services for Japan's largest e-commerce ecosystem, using Java 17 and Spring Boot.
- Gained hands-on experience with R-Cloud (Rakuten's internal Kubernetes platform), deploying containerized microservices and managing cloud resources.
- Monitored backend performance and system health using Prometheus and Grafana to identify latency bottlenecks in production-like environments.
- Maintained and updated CI/CD pipelines through Bitbucket, automating delivery to staging environments.
- Actively participated in Agile rituals, including weekly Asakai (morning meetings) and peer code reviews, collaborating within a diverse, international remote team.
- Contributed to database query optimization (TiDB/Redis) to improve data retrieval speeds for e-commerce services.

Backend Program Lead | Jul 2023 – Present

<Three/Edu> | Baku, Azerbaijan

- Designed and implemented comprehensive training programs for Python, Backend development, and foundational Frontend concepts, ensuring curriculum alignment with industry demands.
- Mentored and instructed over 100+ students, successfully transitioning them from basic concepts to developing full-stack projects.
- Developed and administered technical exams and assessment systems.

Java Web Developer Internship | Oct 2024 – Mar 2025

Khazar University Dunya School | Sumqayit, Azerbaijan

- Designed and implemented RESTful APIs using Java 21+ and Spring Boot to manage core educational data, including courses, students, and class schedules.
- Applied OOP principles to develop modular and production-ready server-side logic.
- Implemented Spring Security and JWT (JSON Web Tokens) for secure user authentication across internal web services.
- Managed and queried PostgreSQL databases, optimizing SQL commands to ensure data integrity and efficient retrieval for reporting.
- Collaborated on the development of an end-to-end Teacher Dashboard.
- Utilized Git for version control and followed established coding guidelines.

Programming Mentor | Aug 2025 – Nov 2025

Algorithmics | Baku, Azerbaijan

- Provided technical mentoring and guidance, helping students build their first programming projects.
 - Conducted regular code reviews and debugging sessions, teaching students clean code principles, OOP fundamentals, and effective problem-solving techniques.
 - Simplified complex computer science concepts (such as algorithms, data structures, and logic) for diverse audiences with varying technical backgrounds.
-
